GEOS MEDIVAC

Emergency evacuation to a hospital near your home. **Starting at \$129.95/year** [Learn More](#)

SMS Message Configuration

When you send a message from your inReach to an SMS (phone) number, the following can be included with each message:

☒ Include my latitude and longitude as text in the message
☒ Include a link to an online map with my location
☒ Include my name as a signature (your name isn't otherwise shown to the recipient)

Step 2 Make sure to also add Redpoint Operations as a standard contact under the Contact Tab

CONFIDENTIAL

Step 4 Plug inReach into your computer and make it hit "sync" to update your device with the settings.

The screenshot shows the top navigation bar of the inReach website with tabs: Home, Map, Inbox, Contacts, Messages, Social, Account, and Sync. The 'Sync' tab is highlighted with a red box and a red arrow points to it from a text box above.

Preset Messages

Quickly send any of these three messages using the Preset Message button/icon on your inReach. Edit text and add recipients below.

Message	Edit
Message 1 **RIPCORD Client [FNAME] [LNAME] in need of emergency assistance** Operations@redpointresolutions.com	Edit
Message 2 Delayed but everything is ok.	Edit

Step 3 Click on the Messages Tab and add the following message into Preset Message 1: **Ripcord Client [FNAME] [LNAME] in need of emergency assistance**- Make sure to add Operations@redpointresolutions.com email into the email address

The image shows an orange and black inReach GPS device. A circular callout highlights the 'X' button on the left side of the device, with the text 'Press & Hold' underneath it.

The Preset Message button/icon can be used to send three different messages you create here on the web site.

- While traveling if you experience a medical or security emergency send Preset Message 1 from your device.
- Sending preset message 1 will notify the Redpoint Operations team of your emergency, and Redpoint Operations will initiate emergency protocols.
- Make sure to only press preset message 1 in the event of an emergency.
- Redpoint Operations recommends conducting a test run to ensure your device is functioning properly.
- After you have configured your device contact our Operations Team at +1(415)-481-0600 in order to set up a test run of your unit. The test run will take approximately 15-20 minutes.
